PROFESSIONAL PROFILE

Data Scientist with a multidisciplinary background and a strong interest in transforming complex data into actionable insights that support better decision-making. I work with **Python, SQL, Machine Learning, statistical analysis, and experimentation** to explore data, identify patterns, and develop predictive solutions.

My international experience across **education, hospitality, and multilingual environments** gives me a strong understanding of these industries from first-hand experience, while also strengthening my ability to **communicate** complex concepts clearly, **adapt** quickly to new environments, and collaborate effectively with people from diverse cultural and professional backgrounds.

I bring an analytical mindset, curiosity, and a problem-solving approach shaped by both technical training and diverse professional experiences. I am particularly interested in opportunities in **EdTech, language learning, and hospitality**, where I can combine my industry experience with data science to improve processes, understand user behavior, anticipate outcomes, and create meaningful **impact**.

TECHNICAL SKILLS

Lenguajes: Python (Pandas, NumPy, SciPy) | SQL | HTML | CSS

Data Science & Machine Learning: Data Cleaning | Data Wrangling | EDA | Feature Engineering | Predictive Modeling | Statistical Analysis | Hypothesis Testing | Supervised and Unsupervised Learning | Model Evaluation

Visualization & BI: Tableau | Power BI | Matplotlib | Seaborn

Cloud & Version Control: Azure | Git | GitHub

Tools: VS Code | Jupyter Notebook | Excel | Trello | Notion | Slack

Methodologies: Agile (Scrum) | Data-Driven Decision Making

TECHNICAL EXPERIENCE

Data Scientist | TripleTen

08/2025 - 05/2026

- Completed **15+ hands-on Data Science projects** covering data analysis, statistical methods, machine learning, forecasting, and business problem-solving across different industries.
- Worked with real-world datasets using **Python, SQL, and data wrangling techniques** to clean, explore, and prepare data for analysis and modeling.
- Built and evaluated **supervised and unsupervised machine learning models**, applying feature engineering, model evaluation, and hyperparameter tuning.
- Applied **statistical analysis and hypothesis testing** to investigate business questions, validate findings, and identify meaningful patterns in data.
- Developed projects across **energy, telecommunications, gaming, mobility, and other business domains**, translating analytical findings into clear, data-driven recommendations.

EXPERIENCIA PROFESIONAL

English Tutor | Preply

Oct 2025 – Present

- Track the learning progress of **10+ international students** using performance indicators, periodic assessments, and structured feedback to identify progress and areas for improvement.

- Analyze learning patterns and gaps to adapt strategies and objectives to each student's needs and development.
- Organize and interpret individual performance data to monitor learning goals and inform decisions about next steps in the learning process.
- Communicate complex concepts and performance insights clearly and effectively to students from diverse cultural and professional backgrounds.

Food & Beverage Assistant | Longboards – Laidback Eatery & Bar, Australia

Dec 2024 – Mar 2025

- Managed food preparation, stock rotation, and bar operations while maintaining accuracy, quality, and food safety standards during high-demand periods.
- Monitored stock levels, preparation needs, and service times to anticipate daily demand and adjust priorities accordingly.
- Collaborated with a multicultural team to coordinate daily operations, prioritize tasks, and respond effectively to changing demands.

Interpreter, Translator and Proofreader | Freelance, Upwork

Jan 2023 – Nov 2024

- Managed multilingual translation and interpretation projects for international clients, ensuring accuracy, clarity, and compliance with deadlines.
- Analyzed and adapted complex information across different industries, audiences, and communication contexts to preserve meaning and intent.
- Incorporated client feedback and project requirements to refine deliverables and communicate effectively across linguistic and cultural contexts.

PROJECTS

Wind Farm Power Output Forecasting & Efficiency Optimization | 2026

- **Description:** Developed a time-series forecasting model to predict regional wind power generation across four major German TSOs, supporting more accurate energy trading and reserve-capacity planning.
- **Stack:** Python, Pandas, NumPy, Scikit-Learn, XGBoost, Time Series Analysis, Feature Engineering, Matplotlib, Seaborn.
- **Impact:** Reduced average prediction error by 37+ MW compared with a naive historical-mean baseline using an optimized XGBoost model.

Oil Well Location Optimization for OilyGiant | 2026

- **Description:** Developed a regional oil reserve prediction and investment analysis model to identify the optimal drilling area while balancing expected profitability and financial risk.
- **Stack:** Python, Pandas, NumPy, Scikit-Learn, Linear Regression, Bootstrap Simulation, Statistical Analysis, Matplotlib, Seaborn.
- **Impact:** Analyzed 300,000+ exploration sites and 1,000 bootstrap simulations, identifying the optimal region with ~\$6.4M expected profit and only 0.5% loss probability, below the 2.5% risk threshold.

EDUCATION & CERTIFICATES

Associate AI Engineer for Data Scientists | DataCamp

Jul 2026 – Present

Data Scientist | Triple Ten

Aug 2025 – May 2026

B.S. in Civil Engineering (Incomplete) | Universidad Nacional de La Matanza, Argentina

Jan 2017 – Dec 2019

LANGUAGES

Spanish (Native) | English (C2 – Fluent) | Portuguese (B2 – Advanced) | Italian (B2 – Advanced) | French (A1 – Basic)
