

Fiorella Trigo - Data Scientist

fiorellatrigo@gmail.com | +54 9 1166463387 | [LinkedIn](#) | [Github](#) | Buenos Aires, Argentina

Professional Profile

I transform complex data into **actionable business insights** through Machine Learning, statistical analysis, and experimentation. I build predictive models using Python, SQL, and modern analytics tools to identify patterns and support data-driven decision-making. My international, non-linear background (from hospitality to teaching) enables me to communicate complex findings clearly to both technical and business stakeholders, and I have a strong interest in sustainability and impact-driven innovation.

Technical Skills

- **Languages & Core Tech:** Python (Pandas, NumPy, SciPy), SQL, Excel.
 - **Data Science & Machine Learning:** Data Cleaning, Data Wrangling, EDA, Feature Engineering, Predictive Modeling, Statistical Analysis, Hypothesis Testing, Scikit-Learn, Model Evaluation.
 - **Visualization & BI:** Tableau, Power BI, Matplotlib, Seaborn.
 - **Cloud & Tools:** Azure, Git, GitHub.
-

Languages

- **Spanish** (Native)
 - **English** (Fluent - C2)
 - **Italian** (Intermediate - B1)
 - **Portuguese** (Intermediate - B2)
 - **French** (Basic - A1)
-

Data Science Projects

Wind Farm Power Output Forecasting & Efficiency Optimization | *Personal Project (2026)*

- Developed an XGBoost forecasting model using 150,000+ historical observations from four German transmission system operators.
- Applied feature engineering and chronological validation to model seasonal patterns while preventing data leakage.
- Reduced prediction error by 37 MW compared to a baseline model and identified the need for

weather-driven features to improve forecasting performance.

Tech: Python, Pandas, Scikit-Learn, XGBoost, Time Series Analysis. Feature Engineering, Matplotlib, Seaborn.

[Oil Well Location Optimization for OilyGiant](#) | **Data Science Bootcamp - Triple Ten (2026)**

- Developed regression models to estimate oil reserve volumes across 300,000+ exploration sites in three candidate regions.
- Performed 1,000 bootstrap simulations to quantify profitability and financial risk under uncertainty.
- Identified the optimal investment region, achieving ~\$6.4M expected profit while maintaining 0.5% loss probability, well below the company's 2.5% risk threshold.

Tech: Python, Pandas, Scikit-Learn, Linear Regression, Bootstrap Simulation, Statistical Analysis, Matplotlib, Seaborn.

Professional Experience

Freelance, Preply | English Tutor | Buenos Aires, Argentina

Oct 2025 - Present

- Track and evaluate learning progress across 10+ international students using structured feedback and performance-based learning strategies.
- Communicate complex concepts clearly to learners from diverse cultural and professional backgrounds.

“Longboards - Laidback Eatery & Bar” | Food & Beverage Assistant, Australia

Dec 2024 - Mar 2025

- Delivered high-quality service in a fast-paced hospitality environment while maintaining accuracy and efficiency.
- Collaborated with multicultural teams to coordinate daily operations during peak-demand periods.

Freelance, Upwork | Interpreter and Translator

Jan 2023 - Nov 2024

- Managed multilingual communication projects for international clients, ensuring accuracy, clarity, and deadline compliance.
- Adapted communication styles across different industries and audiences to support efficient project execution.

Education

- **Data Scientist Certificate**, TripleTen. June 2026
- **B.S. in Civil Engineering (Incomplete)**, Universidad Nacional de La Matanza, Argentina. 01/17 - 12/19
